Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by GB223280. The GB223280 reference discloses the utilization of a portable proximity sensor (5), self contained in housing (2); a battery (see abstract); and an audible alarm buzzer (see abstract) as positively recited elements in claim 4.

The GB223280 reference also discloses the sensor may be placed near or within a personnel safety zone (i.e. a flat or home, see page 4, line 28-30) to indicate the presence of an intruder.

The GB223280 reference also discloses the sensor is capable of being used without being mounted a mobile working machine or fitted to a person.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB223280 in combination with US4897630. The GB223280 reference discloses the utilization of a portable proximity

senor (5), self contained in housing (2); a battery (see abstract); and an audible alarm buzzer (see abstract) as positively recited elements in parent claim 4.

The GB223280 reference also discloses the sensor may be placed near or within a personnel safety zone (i.e. a flat or home, see page 4, line 28-30) to indicate the presence of an intruder.

The GB223280 reference also discloses the sensor is capable of being used without being mounted a mobile working machine or fitted to a person as recited in parent claim 4. The difference between the GB223280 reference and claim 7 is that the claim recites the utilization of a light and horn. The US4897630 reference teaches that it was well known in the art to utilize a light and horn in combination with a proximity sensor. It would have been obvious to modify the GB223280 reference to utilize a light and horn as motivated by the US4897630 reference to enable the GB223280 system to provide both a visual and audible warning.

With regards to the feature of claim 6, the utilization of a plurality of proximity sensors, the GB223280 reference placing a proximity sensor by the door of a home (safety zone) and it would have been obvious to place a proximity sensor by each door of a multi-door home in order to detect intrusions.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Art Unit: 3662

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Pihulic whose telephone number is 571-272-6977.
